

## Pros and Cons of Interactive Viz

- 1) Pros
  - a) Users can look for the specific information they want to see and you do not have to put it all at once
- 2) Cons
  - a) Exploration vs explanation tradeoff:
    - i) Too much interaction and too much information can be a turnoff for a lot of the public, and you need to focus on getting your main message across

## Features in an Interactive Viz

- 1) Changing type of plot displayed
- 2) Focusing on one specific portion and getting more info
- 3) Data transformation for accessibility
- 4) Highlighting

## Shiny
